We are Reputed Engineers of India & are providing our Services across the country.

We provide Design, Engineering & Project Management Services for Power projects across India and also undertake Design, Engineering, Supply, Erection, Testing & Commissioning services for power projects. We are specialist in installing WHRB & AFBC Boiler based Power Plants. We have already commissioned 34 power plants across India ranging from 1.0MW to 67.5MW and at present providing engineering consultancy services to many ongoing power plants. We are specialist in Design, Engineering & Installation of Power Plant based on Waste Heat Recovery Boiler and AFBC Boiler. We are technically highly competent and very responsive consultant. We always give highest priority to all our clients and always work with Zero mistake targets and try to MINIMISE project Cost which is an essential factor for survival. Further our success Mantra is TEAM WORK. To achieve best we always discuss & take suggestion from client team. We are most Economical Engineering Consultancy Company which have proven track record of commissioning plants within shortest time & budget and thus have bagged REPEAT W.O.'s from our clients for their Extension / New Projects. We assure that we will work as a Team to install an Excellent Plant within shortest possible time.

ShaktiPunj Engineers provides its client a host of services related to power projects starting from preparation of Project Report, providing Technical Consultancy, Project Management Services and Operation Trouble Shooting. We provide services in:

A. BASIC CONSULTANCY SERVICES:

- Feasibility Study
- Preparation of Detailed Project Report
- Project Planning, Scheduling, Monitoring & Controlling
- Basic (Design) Engineering Services
- Preparation of Tender Documents
- Specification & Drawings
- Evaluation of Vendor Bids
- Assistance in Contract Negotiations & Contract Document Preparation
- Vendor Drawings Review & Approval (Post Contract)
- Design Development

B. OTHER SERVICES:

Project Engineering Management:

1. Developing Bar Chart indicating work startup & completion period,
2. Determining the actual progress and forecasting of latest completion dates,
3. Maintaining and updating the database for drawings and documents,
4. Monthly Progress reports including initial preparation and subsequent updating of project schedule

Detailed Engineering consisting of:

Mechanical Engineering

1. Preparation of Heat Balance Diagram based on TG / Boiler & Fuel Data,
2. Development & Preparation of Plant Equipment Layout & Landscape,
3. Preparation of Water Balance Diagram and P&ID of various Equipments,
4. Equipment Sizing in respect with BTG package.

Piping Engineering

1. Preparation of Piping Layout based on Plot Plan,
2. Preparation of Isometric Drawings showing Support & Hardware,
3. Flexibility Analysis of Piping & Generation of Stress Analysis Report,
4. Preparation of Bill of Material for Pipes / Valves / Supports / PRDS / PCV,
5. Insulation / Cladding & Painting Schedule.

Electrical Engineering

1. Electrical System Design, Load Flow & Short Circuit Analysis,
2. Equipment Layout for Island & Switchyard,
3. Grounding Design & Details,
4. Cable Sizing, Cable Schedule, Interconnection Engineering,
5. Electrical Equipment Selection & Sizing for procurement.

Instrumentation & Control Engineering

1. Preparation of Logic Diagram & Control Loop Diagram for Power Island System & Supporting utilities for Analog & Digital Controls,
2. Preparation of DCS I/O List and Detailed Instrument list,
3. Selection, Preparation of Specification and Bid Evaluation of DCS System for Power Plant Equipment Control
4. Interface Co-ordination between BTG & other Plant Equipment with DCS.

Civil & Structural Engineering

1. Preparation of Civil Foundation drawings w.r.t. Soil Bearing Capacity for TG Building, Boiler House, Water Treatment Plant, Pump Foundations, Switchyard Panel Room etc.
2. Preparation of BOQ for Civil Materials i.e. steel / cement / aggregates,
3. Preparation of Steel Structural Details for Cable Tray, Cable Support, TG Building Truss, Coal Handling Plant Shed & others.

Post Contract Services and

1. Technical review of Sub-Contractor's package,
2. Field Assistance During Mechanical Erection and Commissioning,
3. As-Built Drawings and Documents,
4. Vendor Shop Inspection, Testing and Quality Assurance,
5. Attending Factory Acceptance Test,
6. Quality Assurance Services During Erection and
7. Project Schedule Monitoring.

Project Site Inspection & Engineering Management.

1. Deputation of Senior & Middle Level Specialist in Civil / Mechanical / E&I to inspect site at regular intervals for assessment of Quality & Quantity of work done,
2. Organizing & Attending Site Co-Ordination meeting with Vendors & Owners Engineers to solve Technical problems & to expedite the field work,
3. Assistance in Commissioning of the Project,
4. Assistance in giving O&M Tips to Station Team of the Plant and
5. Providing Assistance as and when required post commissioning.
